Work History

- Adloggs Technologies Pvt Ltd

Product Manager

Coimbatore

September 2025 - Present

 - Own product execution by gathering stakeholder and user requirements, defining priorities, and driving roadmap initiatives aligned with business objectives.
 - Lead Agile delivery by facilitating sprint planning, tracking progress, and coordinating cross-functional teams including engineering, QA, design, and business stakeholders.
 - Monitor product performance and implementation outcomes, maintain key product documentation, and ensure timely releases that enhance user experience and business impact.
- Dotworld Technologies Pvt Ltd

Associate Project Manager

March 2025 - July 2025

 - Serve as the primary point of contact for clients and stakeholders, ensuring alignment on goals, expectations, and timelines across the project lifecycle.
 - Drive sprint planning, resource allocation, and cross-functional team coordination to enable smooth and timely delivery of product outcomes.
 - Gather and translate business requirements into actionable tasks while maintaining key project documentation and tracking progress using Agile methodologies.
- Webnox Technologies

Client-Focused Communication | Software Developer & Team Lead

Coimbatore

March 2022 - January 2025

 - Acted as a key client liaison, gathering requirements, managing expectations, and ensuring high client satisfaction while delivering scalable backend solutions across 8+ projects.
 - Led and mentored a team of 8–10 developers, driving code quality, improving development workflows, and fostering strong cross-functional collaboration with UI/UX and QA teams.
 - Facilitated Agile ceremonies including sprint retrospectives to identify improvements, remove bottlenecks, and enhance delivery efficiency, contributing to faster bug resolution and better product performance
- Accenture Solutions Pvt Ltd

Associate Software Engineer

Chennai

2017-2018

 - Performed manual testing to ensure software quality, functionality, and performance across multiple applications.
 - Designed and executed test cases, collaborated with developers to identify defects, and improved overall system reliability.
 - Worked within Agile teams to track bugs and manage workflows using JIRA, contributing to faster issue resolution and smoother releases.
